

HydraFacial:

A HydraFacial is a treatment that uses a patented, medical-grade device to cleanse, extract, and hydrate the skin. It clears dead skin cells, loosens pores, and preps them for extraction, using a mix of glycolic acid, salicylic acid, and botanical extracts. This treatment:

- Improves Pore Size
- Removes Dirt and Debris
- Minimizes Fine Lines
- Minimizes Wrinkles
- Improves Elasticity
- Improves Firmness
- Improves Skin Tone
- Improves Skin Texture
- Minimizes Pigmentation
- Offers No Downtime

HYDRAFACIAL

What to Expect:

A 45 minute treatment will be divided into 3 key sections:

- · Cleanse + Peel
- Extract + Hydrate
- Fuse + Protect

Cleanse + Peel:

The HydraFacial technology uncovers a new layer of skin with gentle exfoliation and relaxing resurfacing. A mixture of glycolic and salicylic acids called GlySal, delivers the benefits of a chemical peel, without post-peel scaling.

Extract + Hydrate:

The Activ-4 serum removes dead skin cells to reveal healthy skin. Debris is removed from pores with painless suction. Intense moisturizers are used to nourish and quench the skin.

Fuse + Protect:

The skin's surface is saturated with antioxidants and peptides to maximize your glow.

Recommended Treatment:

This treatment is amazing at maintaining the health of your skin. It is recommended that a HydraFacial treatment be scheduled every 4 weeks.

Pricing:

One HydraFacial costs \$350. To achieve optimal results, one treatment should be performed every 4 weeks.

Pre-Procedure:

- Refrain from any type of exfoliating treatments such as glycolic acid or enzymes to the area, 48 hours before a HydraFacial.
- Avoid chemical peels and laser treatments, 2 weeks prior to a HydraFacial treatment.

Post-Procedure:

- Refrain from any type of exfoliating treatments such as glycolic acid or enzymes to the area, 48 hours after a HydraFacial.
- · Avoid excessive heat hot showers, saunas, or heavy workouts for 24 hours following a HydraFacial treatment.
