

LAMPROBE

Pricing:

Treatments are typically priced at \$150 per 15 minutes.

Pre-Procedure and Post-Procedure:

- DO NOT touch or scratch the treatment area.
- Avoid perfumed or alcohol-based products.
- Avoid using soap or foundation on the treatment area for 24 hours.
- Avoid direct sun exposure 48 hours before, and 72 hours after treatment. Wear SPF 30 or higher and protect the treatment area with clothing, a hat or umbrella.
- Avoid strenuous activity, exercise and sports for 48 hours following the Lamprobe treatment.
- Avoid alternating cold and hot conditions.
- DO NOT exfoliate the skin. Let the small skin flakes fall naturally.
- DO NOT pick, scratch, or itch healing areas. Some areas may have scaling, which is normal while new skin comes in and rejuvenation occurs.
- Avoid saunas, hot tubs, tanning beds, and chlorinated water for 7 to 10 days after treatment.

Depending on the type of lesion treated, patients should expect the Lamprobe recovery period to take anywhere from several days to a few weeks. Minor redness and possibly a small scab may occur at the treatment site, but this will diminish as the blemish fades.

Lamprobe:

A breakthrough cosmetic innovation that incorporates non-invasive radio and high frequency technology to treat minor skin abnormalities, without penetrating the skin's surface. It can treat:

- **Vascular Irregularities**
- **Dilated Capillaries**
- **Cherry Angiomas**
