

WAXING

Pricing:

Waxing procedure prices vary, depending on the area and the treatment size.

- Small Area - \$100
- Medium Area - \$200
- Large Area - \$300 to \$500

Pre-Procedure:

It is just as important to care for and prepare the treatment area before waxing, as it is to do so after. The following tips will ensure a quick appointment, with minimal pain.

- Trim the hair in the treatment area before your appointment. Longer hair can be more painful to wax.
- Ensure your hair is at least 0.5cm long, so your aesthetician can remove the hair without having to wax the area multiple times. First-time waxers should have hair growth of about 1.5cm.
- Exfoliate the waxing area 24 to 48 hours before your appointment. This will keep the skin soft and smooth, as well as prevent ingrown hairs.
- Bathe or shower on the day of your appointment to open the hair follicles, which allows for easier hair removal.
- DO NOT apply any deodorants, makeup, lotions, soaps, powders, perfumes, or self-tanning products to the treatment area.

Post-Procedure:

After your waxing service, you may expect the area to be red. Some may experience blood spots, due to thicker coarser hair. The treatment area may feel tender and tingle.

For the first 24 hours after a waxing service, avoid the following to prevent irritating the skin:

- Touching or scratching the waxed area.
- Exfoliating the waxed area.
- Perspiration and friction on the waxed area.

Waxing:

This service leaves your skin soft, smooth and hair free. Areas that are great for waxing are the:

- **Brows**
- **Underarms**
- **Bikini Area**
- **Back**

WAXING

- Saunas and steam rooms.
- Exercise, gyms and swimming.
- Sunbathing, tanning beds, or any sunlight or UV exposure, as sweat can infect open follicles and heat can irritate the waxed area.
- Applying products to the waxed area, such as deodorants, makeup, lotions, soaps, powders, perfumes, and self-tanning products.
- Tight fitted clothing, as that may cause friction to the waxed area.

Instructions:

- Shower with the water temperature cold. Ensure the water runs off the waxed area and you DO NOT wash or scrub the waxed area.
- Book your waxing service at least 2 days before you go on vacation, so the skin can calm down, and the follicles can have enough time to close.
- To calm the skin, it is suggested you regularly apply aloe vera. This will rehydrate the skin, and soothe any discomfort you may experience. Tea tree oil can also be applied to the area, as it's anti-bacterial properties ensure the treatment area remains free of bacteria.
- Remember, it is important to keep the waxed area clean and dry for 48 hours after your appointment.

Aftercare:

Ensure you prevent ingrown hairs 3 to 10 days after your waxing treatment. The skin will close over the hair follicles, and new hair has the possibility to get trapped and cause ingrown hairs.

- Gently exfoliate the waxed area 2 to 3 times per week with a face or body scrub. Start exfoliating 2 to 3 days after your waxing treatment, depending on how the skin looks and feels. It is essential that you perform this routine between 3 to 10 days after your waxing service. DO NOT over exfoliate, as this can cause damage to the skin.
- Following exfoliation, moisturize the skin with an enriching and nourishing cream or lotion. Doing so will prevent ingrown hairs, and ensure that your next waxing treatment will be easier and less painful.
